HAMZA KHAN LODHI

Software Engineer

Location: Karachi, Pakistan **Contact:** +92 327 3622257 **Email:** *hamzalodhi2023@gmail.com*

LinkedIn: *hamzakhanlodhi* **GitHub:** *hamzalodhi2023* **Portfolio:** *Hamza Khan Lodhi*

ABOUT ME

Software Engineer with hands-on technical experience in **designing and building modern web applications.** Currently working as a **Software Engineer Intern at Geeks of Kolachi,** working across frontend and backend technologies including **Odoo, JavaScript, TypeScript, React, Next.js, Node.js, MongoDB & MySQL.** Practical exposure to **application logic, responsive UI implementation, API integrations, and continuous version control workflows**. Pragmatic problem solver focused on writing maintainable code, adopting modern engineering practices, and continuously building software engineering skills in collaborative team environments.

COURSES & PROFESSIONAL DEVELOPMENT

Technical training, self-paced courses, and specialized learning programs:

- **Sindh Police Certificate of Appreciation – Complaints Management System (CMS) & Website Development**
- **Claude Academy: Building with the Claude API**
- **Claude Academy: Claude 101**
- **Claude Academy: Claude Code 101**
- ***Microsoft: Introduction to GitHub***
- ***HP LIFE:* AI for Business Professionals**
- ***HP LIFE:* Critical Thinking in the AI Era**
- **IBM via *Coursera: Introduction to Software Engineering***

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript
- **Frontend Development:** React.js, Tanstack Query, Redux & Redux Toolkit, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Node.js, Express.js, RESTful APIs, Hybrid Authentication, Prisma ORM, Drizzle ORM, Zod
- **Databases & Storage:** MongoDB, MySQL,
- **Testing & Automation:** CI/CD Pipeline, Playwright Tests, Github Actions
- **Version Control & Tools:** Git, GitHub, Vscode, Antigravity, Cursor
- **Deployment** Hostinger, Vercel, Domain.pk, Netlify
- **Additional Tech:** Odoo ERP, Linux, Windows

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — Geeks of Kolachi

18 May, 2026 – **Present**

Karachi, Pakistan

- Gained hands-on experience in Software Engineering workflows, working with modern JavaScript frameworks, backend APIs, and database structures.
- Contributed to frontend development tasks by building component interfaces using React and styling tools like Tailwind CSS, focusing on UI consistency and responsiveness.
- Participated actively in internal technical discussions, team planning meetings, and peer code reviews to understand commercial software development standards.
- Learned and applied GitHub-based development workflows, including feature branching, pull request reviews, and collaborative repository management.

Geeks of Kolachi — Full Stack Developer Intern Key Learnings & Contributions:

- Explored automated testing concepts and learned how testing tools like Playwright ensure application reliability across modern web applications.
- Worked on improving debugging and analytical problem-solving skills by troubleshooting bugs and identifying resolution paths alongside senior engineering staff.
- Studied best practices for RESTful API design, data handling, and backend logic construction within Node.js environments.

TECHNICAL PROJECTS

Rozgar Connect — Web Application (Concept Project)

Repository Link

Technologies: React, Vite, Tailwind CSS, Redux Toolkit, Socket.IO, JWT Authentication

- A web application concept focused on job search dynamics and real-time interaction features.
- Developed responsive layout interfaces with React and Tailwind CSS, utilizing Redux Toolkit for global state management.
- Implemented client-side JWT token handling for authentication workflows and secure view routing. Explored real-time communication mechanics by integrating Socket.IO event listeners for live web updates.

EDUCATION

Intermediate in Arts (FA)

Board of Intermediate Education Karachi

Matriculation (Secondary School Certificate)

Board of Secondary Education Karachi

ADDITIONAL TECHNICAL INTERESTS

Focused on developing long-term software engineering expertise across modern technology domains:

Full Stack Web Engineering: Scalable web architecture using Next.js, Node.js, and modern TypeScript.

ERP Solutions: Deepened customization and module architecture within Odoo ecosystems.

Software Quality & Automation: Automated browser testing and end-to-end user flows using Playwright.

Developer Workflows: Continuous integration concepts, Git branch workflows, and API design standards.

CORE COMPETENCIES & WORKING STYLE

Continuous Learning: Dedicated to expanding technical breadth through structured coursework, official documentation, and practical build exercises.

Team Collaboration: Experienced in participating in technical discussions, receiving code feedback constructively, and adapting to established team standards.

Methodical Problem Solving: Approached debugging and feature implementation systematically with clear attention to fundamental software mechanics.
